

## Attention Utah Medicaid Pharmacy Providers

---

### **Update: Pharmacy Copay Increase**

Effective on October 1, 2017, pharmacy copay will increase from \$3 to \$4 for each prescription for Medicaid recipients.

Note: Pharmacy copays for clients enrolled in Accountable Care Organization (ACO) will be split between Fee-For-Service (FFS) Medicaid and the ACO plan.

For drugs that are covered by the ACO, the maximum copay out-of-pocket will be \$12 per month. For drugs that covered by FFS Medicaid, the maximum copay out-of-pocket will be \$8 per month. The copay limits will accumulate concurrently in each plan. After the \$12 copay maximum in the ACO is met, additional ACO-paid prescriptions filled in the month will have no copay. Similarly, after the \$8 copay maximum in FFS is met, additional FFS-paid prescriptions filled in the month will have no copay. These copay limits will reset at the start of each calendar month.

For recipients with no ACO benefit, the copay out-of-pocket will be \$20 per month.
